PROUDLY MADE IN QATAR

Light Caravan

Made in Qatar... to go anywhere.

Made in Qatar... to go anywhere.

At Light Caravan, we don't just build caravans — we build spaces designed to accompany our clients wherever their journey takes them. From concept and design, through manufacturing and fit-out, to the finished product, every project we deliver is guided by a single standard: the balance of quality, functionality, comfort, and distinctive design.

Designed. Engineered. Built in Qatar.

About us

Light Caravan was founded in the State of Qatar in 2017, specializing in the design and manufacturing of caravans, mobile solutions, and special projects. We bring together hands-on manufacturing experience, modern design thinking, and local production to deliver products built around each client's needs. We believe every project is different. That is why our work begins with understanding what our client needs, and ends with a product designed and built specifically for them.
